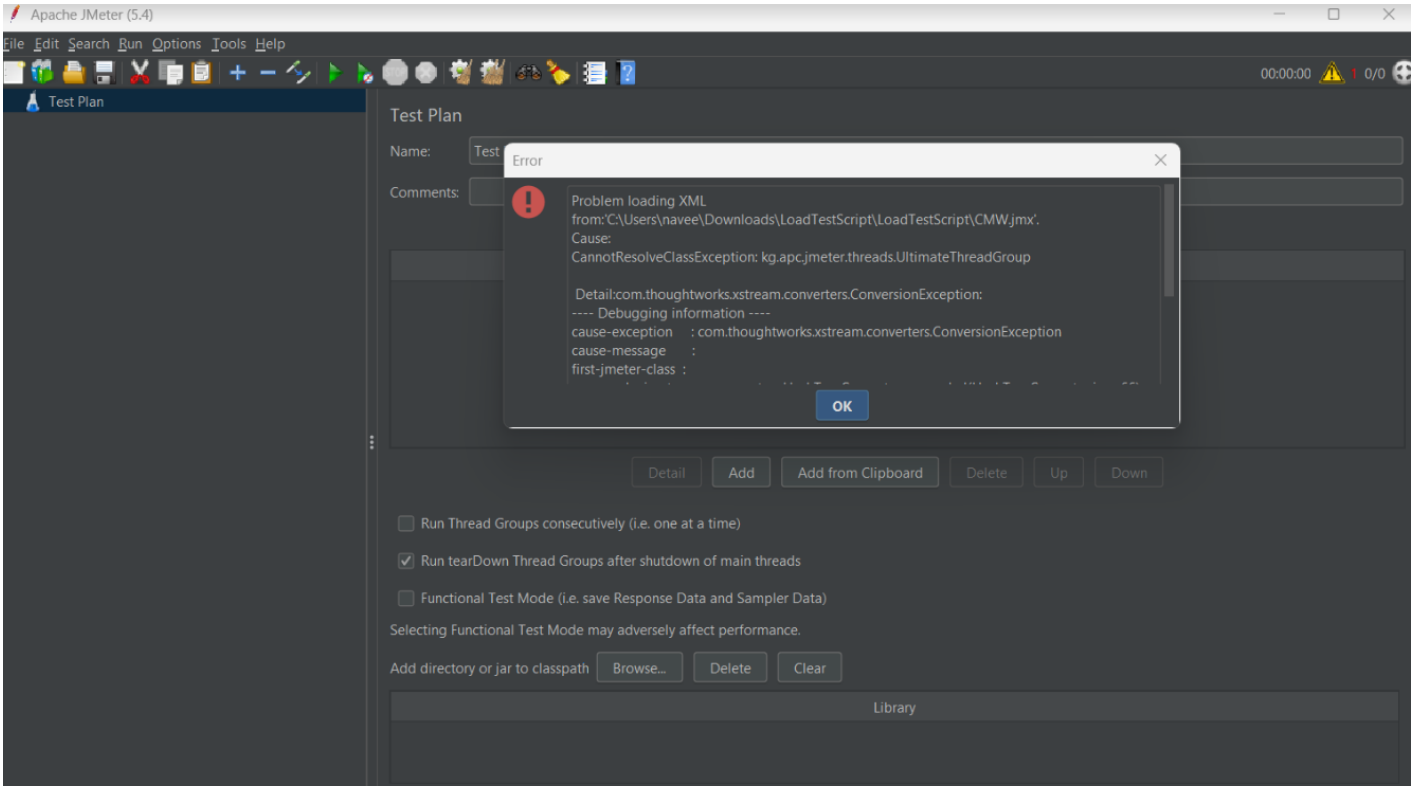
Add JMeter Plugins for AIQ Executions

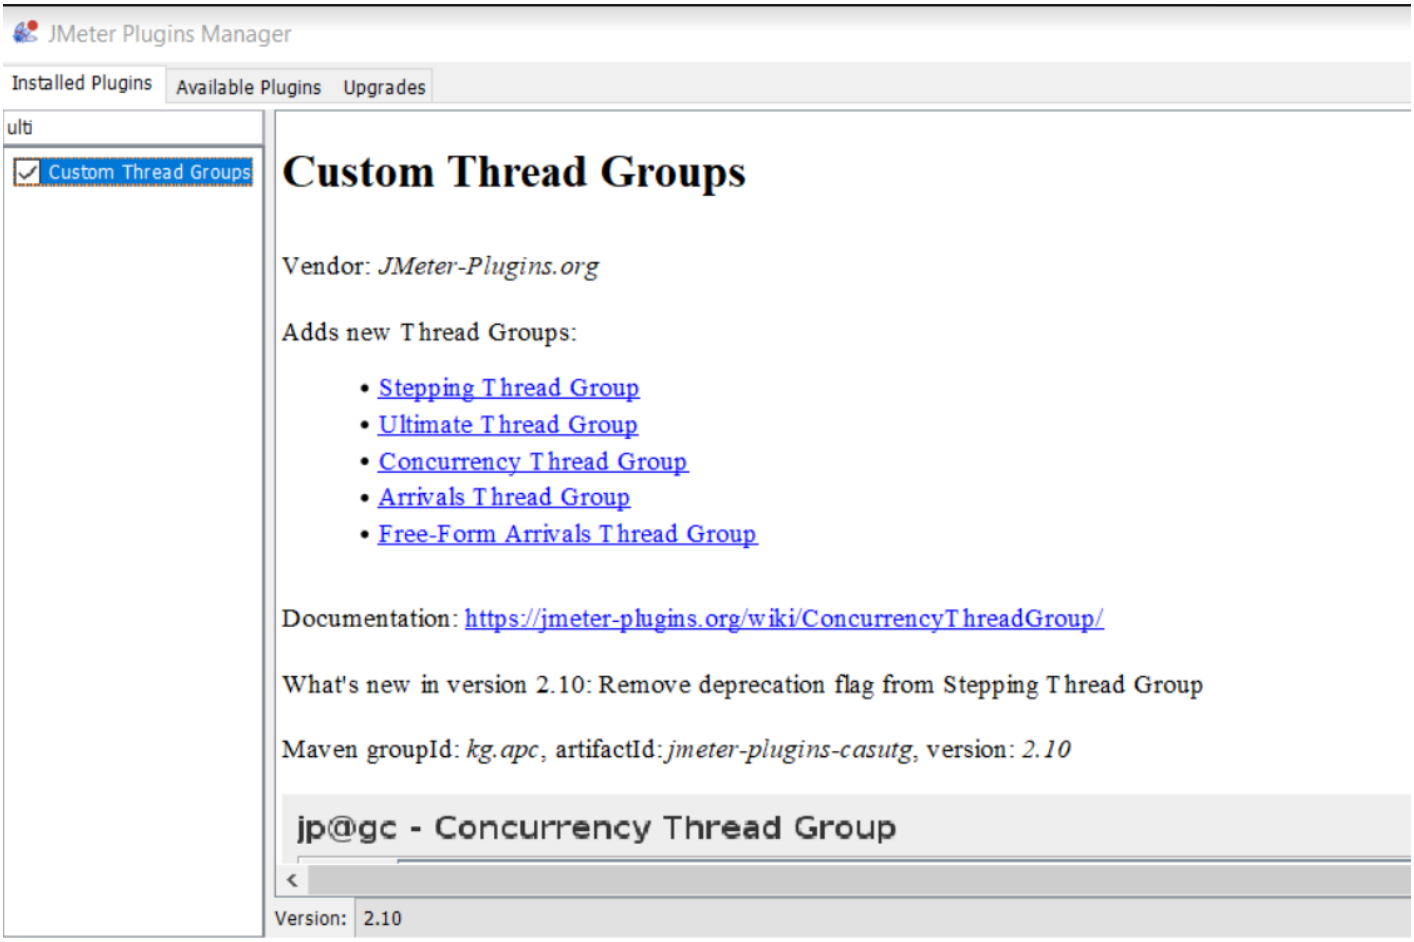
There are some cases where Jmeter scripts are created using plugins For example, Concurrency Thread Group. However, if you try to open those scripts in Jmeter without installing the plugin results in an error.



If you try to run the script in Appvance IQ, you would get errors and the script would fail.

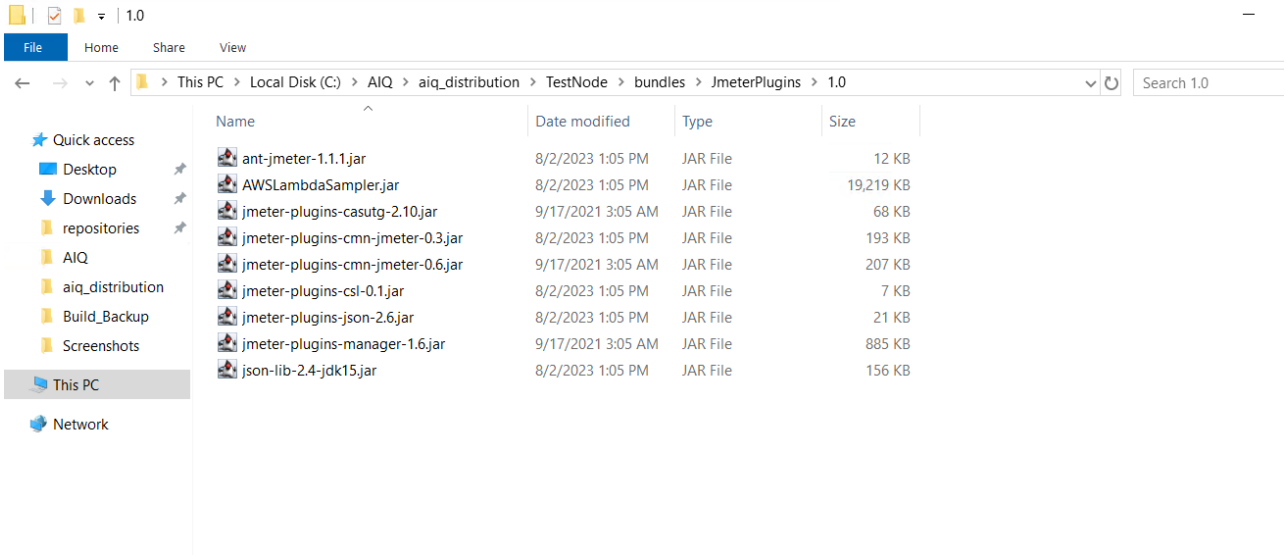
Installing Plugins in Jmeter

Use the **JMeter Plugin Manager** to install plugins in Jmeter.

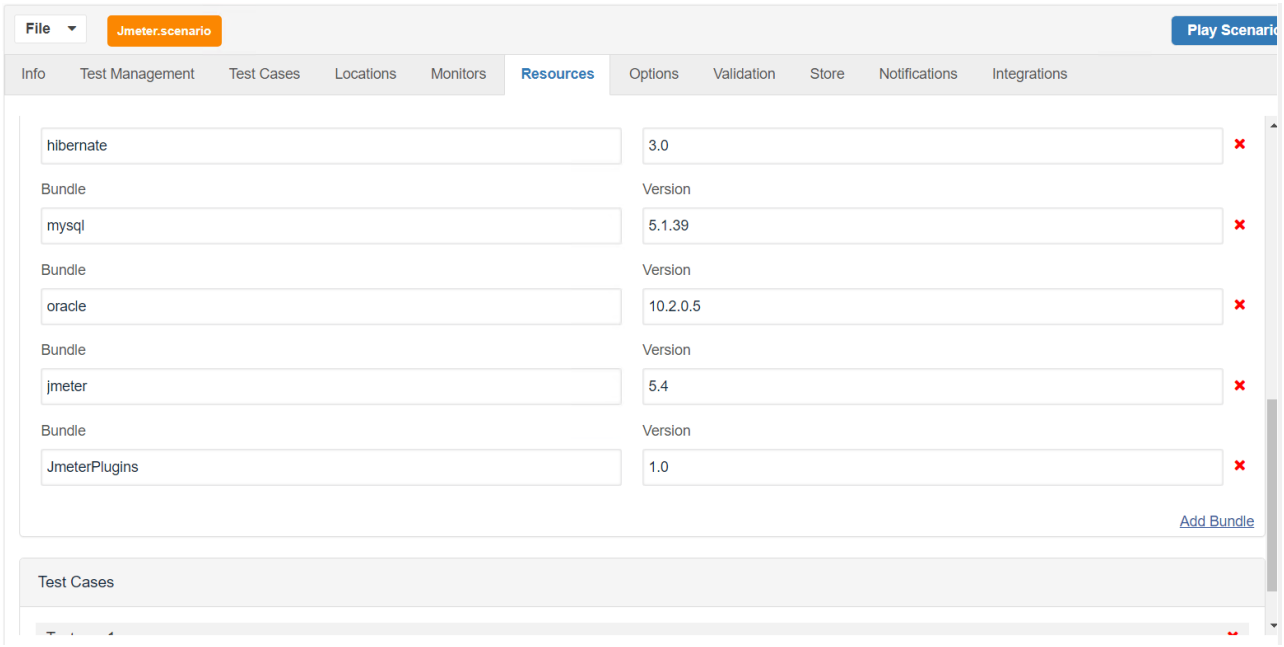


Adding Plugins in AIQ

1. On the controller or the test nodes where the scripts should be run, navigate to `C:\AIQ\aiq_distribution\TestNode\bundles\JmeterPlugins\1.0` and include all the jar files.



2. From **Scenario Editor**, navigate to the **Resources** tab.
3. Add the **JmeterPlugins** bundle with a Version of 1.0.



4. Save and play the scenario.
