

Installation and Configuration FAQ

Use this FAQ for current AIQ installation and configuration questions that do not require a dedicated procedure page.

What changed in this article

- Renamed the generic FAQ title so it is clear which book/context it belongs to.
- Reframed the FAQ as a routing and troubleshooting aid for installation/configuration topics.
- Added checks to avoid duplicating content that belongs in dedicated upgrade, Test Node, certificate, browser, or performance pages.

Validation workflow

1. Use this FAQ for short installation/configuration answers only when a dedicated article does not already cover the topic.
2. Link to the canonical procedure page when the answer requires multiple steps or risk controls.
3. Review FAQ entries periodically and promote repeated issues into standalone articles.

Review note: This page now has a clear scope and should not become a dumping ground for unrelated topics.
