

AI 3.0 (AIQ 5.x)

AI Script Generation 3.0 in AIQ

AIQ release 5.0.0 contains a comprehensive update to the AIQ AI engine that results in enhanced performance, reporting, and bug-finding accuracy.

Some highlights of the improvements include:

- Optimized performance means that your AISG will run faster.
- Calculated page states are more accurate and reliable when executing custom actions on specific pages.
- User interface has been re-factored to make it more intuitive and accessible to new users.
- You can data drive your AISG by adding data sets prior, during, and after AISG execution. You do not have to reset or restart the AISG if you forgot to add a data set when you added an execution.
- Existing AISG that were created in older versions of AIQ will automatically be upgraded to the new format when you open them for the first time in AIQ 5.0. See [Upgrading Blueprint Files to AI Script Generation Files for more information.](#)
- AISG Designer is the new AIQ 5.x AISG user interface. Unlike the updated Web Designer interface, there is no corresponding "classic" version of AISG Designer in AIQ 5.0.

In AIQ 5.0.0 AISG is only supported on Windows test node.

Autonomous Testing Options

This is the Autonomous Testing menu in AIQ release 5.0.0.

The following sections detail working with those options:

- AISG Designer - [Working with AI Script Generation](#)
- Coverage Map - [Exploring the Coverage Map](#)

Changes from Previous Releases

- Mobile AISG is not enabled in the AIQ release 5.0.0. This function is being enhanced and will be reintroduced in a future release of AIQ.
- The Blueprint Template Editor has been removed as part of the AISG enhancements.
- The Compare AISG option is not enabled in AIQ release 5.0.0. This function is being enhanced and will be reintroduced in a future release of AIQ.
- The Generate Scripts option is not enabled in AIQ release 5.0.0. This function is being enhanced and will be reintroduced in a future release of AIQ. However, you can now generate a DS script from the Coverage map, or download all actions in the AISG as a DS script.

A dedicated training course on AISG is available as part of Appvance's training offerings. See the [Appvance Training](#) page for more information.

For your convenience, the information about the new AISG functionality is included in the [AIQ 5.0.0 Release Summary](#). This document also contains the AIQ 5.0.0 Release Notes, which includes information about the AIQ 5.0.0 release.
