

Getting Started with AI Script Generation

This page walks through the prerequisites and the different ways to launch and create an AI Script Generation in Appvance IQ.

Prerequisite: before you can work with AI Script Generation, you must have a **repository configured** to store your AISG files. *Storing files locally is not supported.*

Launching AISG

You can access AI Script Generation in two ways from the AIQ home screen:

- From the top-line menu, click **AI Driven**.
- From the left menu, expand **Autonomous Testing** and select **AI Script Generation**.

AI Driven option

The AI Driven option on the top-line menu.

Autonomous Testing menu

Autonomous Testing > AI Script Generation in the left menu.

Ways to begin

- **Upgrade** an existing pre-AIQ 5.0 Blueprint file to the AI Script Generation format.
- **Create a New Web AI Script Generation** — for web applications.
- **Create a New Mobile Digital Twin** — for mobile apps.
- **Use an AI Script Generation Template** — export an existing AISG as a reusable `.abpt` template.

Upgrading pre-5.0 Blueprints

1. Navigate to **Autonomous Testing > AI Script Generation** (or click **AI Driven**).
2. Click **Open** and navigate to the repository containing your AISG files.
3. Open a blueprint. The **Create New Template** dialog informs you that the blueprint must be updated.
4. Click **Confirm**. Once the AISG file loads, the upgrade is complete — SmartTags and validations carry over automatically.

Open repository

Opening the repository that holds your blueprint files.

Confirm upgrade

The Create New Template confirmation dialog.

Upgraded blueprint

The upgraded AI Script Generation file, ready to execute.

What happens behind the scenes on upgrade

- A backup of the old blueprint is created as `<blueprint_name>-backup.abp`.
- A blueprint template file (`<blueprint_name>.abpt`) is created.
- A new folder named after the blueprint is created, and all linked files (SmartTags, validations) are copied into it.
- A new blueprint file with the same name is created from the template.
