

Deploy Dynatrace

A single Dynatrace OneAgent monitors real user experience and all the technologies, services, and applications that run in your environment. Just install OneAgent.

Dynatrace Agent for Windows:

From your Dynatrace account, From the left navigation panel, go to 'Deploy Dynatrace'

Click Start Installation.

Select Windows as the platform

1. Download and run the installer on the target host, you will find the link to download the agent.
2. Restart the processes that you want to monitor.

Dynatrace Agent for Linux:

Installer type: x86/64

Run the installation script on each Linux machine that you want to monitor.

#Use this command on the target host:

```
wget -O Dynatrace-OneAgent-Linux-1.141.205.sh "Your OneAgent URL"
```

#Verify signature:

```
wget https://ca.dynatrace.com/dt-root.cert.pem ; ( echo 'Content-Type: multipart/signed;  
protocol="application/x-pkcs7-signature"; micalg="sha-256"; boundary="--SIGNED-INSTALLER";  
echo ; echo ; echo '----SIGNED-INSTALLER' ; cat Dynatrace-OneAgent-Linux-1.141.205.sh ) | openssl  
cms -verify -CAfile dt-root.cert.pem > /dev/null
```

#And run the installer with root rights:

```
/bin/sh Dynatrace-OneAgent-Linux-1.141.205.sh APP_LOG_CONTENT_ACCESS=1
```

#Restart the processes that you want to monitor.
