

Manage AIQ Report Templates

Last reviewed: September 24, 2026

Report templates control how AIQ execution results are packaged for review, sharing, and customer-facing evidence.

Recommended guidance

- Keep standard templates aligned with the metrics your team uses for release decisions.
- Avoid editing production templates without saving a versioned copy first.
- Validate templates against recent results before sharing them externally.

Validation workflow

1. Open the report template settings and identify the template to update.
2. Adjust sections, labels, and included metrics as needed.
3. Generate a sample report from a recent execution to confirm the output.
