

Changing Time Zones in Jenkins

By default, the timezone is in UTC.

If you want to change the timezone to a different one:

1. Navigate to **Build Triggers**.
2. Check the **Build Periodically** option.
3. Define the **Schedule** as:

TZ=EST5EDT

0 16 * * 1-5

General Source Code Management **Build Triggers** Build Environment Build Post-build Actions

Build Triggers

- ☐ Trigger builds remotely (e.g., from scripts) ?
- ☐ Build after other projects are built ?
- ☒ Build periodically ?

Schedule ?

TZ=EST5EDT
0 16 * * 1-5

⚠ Spread load evenly by using 'H 16 * * 1-5' rather than '0 16 * * 1-5'

Would last have run at Wednesday, September 22, 2021 8:00:42 PM UTC; would next run at Thursday, September 23, 2021 8:00:42 PM UTC.

- ☒ GitHub hook trigger for GITScm polling ?
- ☐ Poll SCM ?

Build Environment

4. This means we are setting the timezone to be EST and setting the run time at 16:00 PM from Monday to Friday.

For more timezone codes, please refer to [Time Zones information at Java Locale for “English \(United States\)” \(en-US\) at LocalePlanet](#).
