

How to get DPL data in the service suite?

The below code iterates on the columns and fetches the DPL data we want to use in the script.

The screenshot shows the Appvance.ai JS Editor interface. On the left is a sidebar with navigation options: Dashboard, Test Designer, Mobile Designer, AI Scripting, Service Suite, JS Editor (selected), API Testing, Scenario Editor, Play, Analyze, DPL Options, Traffic, Global Options, and Tutorials / References. The main area has a 'File' and 'Options' dropdown. A script named 'testCsv.js' is open, containing the following code:

```
1 setVariablesIfNeeded('test.csv','HashDPL',0,'en_US');
2 var Length = 5;
3 for (j=1; j<=Length; j++) {
4   var val = eval("$Test"+j);
5   log(val);
6 }
```

Below the script editor, the execution results for 'testCsv.js (Done)' are shown:

```
Processing $Test1: "text1"
Processing $Test7: "text6"
Processing $Test5: "text5"
Processing $Test4: "text4"
Processing $Test3: "text3"
Processing $Test2: "text2"
text1
text2
text3
text4
text5
Playback completed successfully.
```

```
setVariablesIfNeeded('test.csv','HashDPL',0,'en_US');
var Length = 5;
for (j=1; j<=Length; j++) {
  var val = eval("$Test"+j);
  log(val);
}
```

Example Code

[test.csv](#)
