How to perform Mouse Over action using Toggle Style API From Test Designer

We have the below two APIs to perform mouse over from Test Designer

- Mouse Over
- Toggle Style

MouseOver using Toggle Style Action

Add the below step with the accessor which needs to be Mouse over

1. Select API as **Toggle Style** from the scripts step
2. Add the Accessor which needs to mouse over
3. Add **“hover“** in the value column

Example Screenshot

No		Action	Accessor	Value	Description
1		Navigate To	"https://www.sodapdf.com/"		Navigate to site
2		Toggle Style	listItem("hidden_m item item-tools")	"hover"	Mouse over on the element
3		Click	link("PDF to Excel")		click on PDF to Excel link

Mouse-over verification

Use `Toggle Style` with the target accessor and the value `hover` when the application exposes the hover behavior through CSS or a related event. Confirm the resulting menu, tooltip, or style change before continuing. If the application requires a pointer event that Toggle Style cannot reproduce,

retain the separate Mouse Over API option and document the observed behavior.
