Precedence of MySQL credentials in Appvance IQ

There are 3 different ways a user can provide the MySQL credentials in Appvance IQ.

1. Scenario Builder - Options Panel - Database logging.

2. Options Page - Preferences - Results tab.

3. Scenario Builder - Info Panel - Include Scenario where other scenario is included.

Here is the precedence on how AIQ picks up the data base credentials.

1. Console Credentials in Options page (if enabled)

2. Overridden by Include Scenario credentials (if any).

3. Overridden by Scenario Builder - Options Panel credentials (if any).
