

Adding Test Designer client Icons in Mac OS

1. Download and extract PlaceOnDesktop.zip to your Desktop
2. Notice four (4) .command files
 1. The files can be used to easily manage your local Test Designer client

2. The first time you run each, the unidentified developer warning message appears
 1. Click **OK**
 2. Click **Apple > System Preferences** and select **Security & Privacy**
 3. Click **Open Anyway** in Allow apps downloaded from:

4. Repeat the steps for each of the .command files (once)
