

Mac Test Designer Install -
Getting Test designer.app
cannot be opened because
the developer cannot be
verified

1. In the Finder on your Mac, locate the app you want to open.
2. Don't use Launchpad to do this. Launchpad doesn't allow you to access the shortcut menu.
3. Control-click the app icon, then choose Open from the shortcut menu.
4. Click Open.
5. The app is saved as an exception to your security settings, and you can open it in the future by double-clicking it just as you can any registered app.

Note: You can also grant an exception for a blocked app by clicking the Open Anyway button in the General pane of Security & Privacy preferences. This button is available for about an hour after you try to open the app.

To change these preferences on your Mac, choose Apple menu > System Preferences, click Security & Privacy, then click General.
