

HTMLUnit Bundle Required When Running a Scenario

Issue

An error occurs when running a scenario from AIQ because the required HTMLUnit bundle is not available.

Solution

Add the required **htmlunit** bundle to the scenario resources.

1. Navigate to **Scenario Builder** and open the scenario.
2. Open the **Resource Panel**.
3. Click **Add Bundle**.
4. Add the following bundle:
 - **Bundle:** `htmlunit`
 - **Version:** `2.15.2648`
5. Click **Save**.
6. Re-run the scenario.

The scenario should run successfully after the required HTMLUnit bundle has been added.
