

Release 5.2.1

Release 5.2.1

This page is retained as a historical AIQ 5.2.1 release note. Release-note pages should preserve the original release context while keeping formatting, terminology, and navigation consistent with current documentation.

Review guidance

- Do not rewrite historical feature or fix descriptions unless a factual correction is required.
- Use current product names only where the page needs clarification for readers, such as Scenario Editor, Service Suite, or AISG.
- Keep links, prerequisites, and upgrade cautions accurate for the release family.
- Flag obsolete references when they point users to retired workflows.

Validation checklist

- Confirm the release number and release family are correct.
- Check links to related release notes or upgrade instructions.
- Confirm no duplicate in-page title or stale “Last reviewed” banner remains.
